

SN. 09/713,400

ATTORNEY DOCKET NO. WATA:009

End
refractive index of light of not more than 1.5 at the wavelength of 550 nm;

said predetermined number is an integer not less than 1 and each of said first and second films has a thickness that allows the light reflectance in a visible light region of said reflector to fall within a range of 5 - 95% and the difference between a maximum value and a minimum value of light reflectance of wavelength components in the visible light region to be approximately 10% or less.--

27
--3. (Three Times Amended) A substrate for liquid crystal display elements as claimed in claim 1, wherein said light reflectance in the visible light region of said reflector is in a range of not less than 5% but less than 25%.--

29
--8. (Three Times Amended) A substrate for liquid crystal display elements as claimed in claim 1, wherein said light reflectance in the visible light region of said reflector is in a range of not less than 25% but less than 45%.--

30
--15. (Three Times Amended) A substrate for liquid crystal display elements as claimed in claim 1, wherein said light reflectance in the visible light region of said reflector is in a range of not less than 45% but less than 65%.--

31
--24. (Three Times Amended) A substrate for liquid crystal display elements as claimed in claim 1, wherein said light reflectance in the visible light region of said reflector is in a range of not less than 65% but less than 95%.--
